KMPA
KOREAN MINING PROFESSIONALS AUSTRALIA

FOR EMPLOYERS, INDUSTRY PARTNERS & METS COMPANIES

PARTNER WITH KMPA · 산업 파트너 안내

Reach a bilingual, site-experienced talent network across mining, oil & gas and METS.

KMPA is a member-led, independent professional association for Korean-heritage professionals in Australia's resources industry — engineers, operators, trades, HSE, commercial and technology people, plus the students who will follow them. We connect members with employers, and Australian capability with Korean industry.

8 role groups
From drill & blast engineers to HD fitters, control-room operators and project controls

KO · EN
Bilingual professionals who work in Australian operations and understand Korean industry

AU ↔ KR
A practical bridge to Korean EPC, energy, shipbuilding, investment and government

Independent
Member-led, not a promotional arm of any company · opt-in member data

WAYS TO WORK WITH US · 협력 방식

Four ways employers and partners engage with KMPA

Every partnership must create information, people, opportunity or growth for members — and a measurable return for you.

Employer briefing — 01
Present roles, pathways and culture directly to members
A structured session with your hiring managers and KMPA members across role groups — graduates to senior leaders — followed by warm introductions to members who opt in. 채용 담당자와 회원이 직접 만나는 자리.

Talent Exchange — 02
Privacy-first access to a capability pool
Members build opt-in capability profiles. Partners see skills and experience, not personal details; introductions happen only with the member's consent. No agency fees, no exclusivity.

Practice communities & Problem Bank — 03
Bring an operational problem
Six practice communities and a Problem Bank connect site problems with members, technology providers, researchers and start-ups — from drill & blast and processing to automation and data.

Korea market access — 04
Trusted introductions into Korean industry
For Australian companies looking at Korean customers, partners, EPC or investors — and for Korean companies entering Australian resources — KMPA members provide practical, on-the-ground context on both sides.

TALK TO US · 파트너십 문의

Host the first employer briefing. Sponsor a mentoring intake. Bring us a problem.

Partnership packages are being finalised for 2027. Early partners help shape the program — and meet the Founding Members first. Email info@kmpa.com.au or use “Talk to us” on the website.

PARTNERSHIP OPTIONS · 협력 옵션

Option	What it involves	What you get
Event partner	Host or sponsor a technical or career event (role-mix format, senior industry guest)	Brand presence, speaking slot, direct member contact
Employer briefing	Dedicated session: your roles, pathways, culture; Q&A with members; warm introductions (opt-in)	Qualified, bilingual candidates; measurable introductions
Program sponsor	Sponsor a mentoring intake, the student careers program or Knowledge Notes	Named program association, early-talent pipeline
Knowledge partner	Provide speakers, case studies or site visits for practice communities	Thought leadership with a technical audience
Pilot & research collaboration	Co-develop an applied research, pilot or commercialisation project through the Problem Bank; consortium funding applications where eligible	Access to members' operational insight and Korean technology partners

WHO OUR MEMBERS ARE · 회원 구성

Not an engineers-only club

KMPA targets ≥35% non-engineering, field and trades representation by Year 3.

Engineering & Technical · Operations & Production · Trades & Maintenance · **Oil, Gas & Energy** · Safety & People · Projects & Commercial · METS & Technology · Students & Early Career

- **Sectors** — mining, oil & gas (LNG, offshore/onshore), mineral processing, METS; expanding into critical minerals and energy transition
- **Geography** — WA-based, with members across QLD and NSW and Korea-linked projects
- **Languages** — Korean and English, with experience in Australian operations and Korean corporate culture

HOW WE WORK · 운영 원칙

- **Independent** — KMPA is not the promotional arm of any company. We maintain partner diversity and technical independence.
- **Privacy-first** — member data is opt-in. Contact details, job-seeking status or salary expectations are never shared without consent.
- **Not a recruitment agency** — no placement fees, no exclusivity. We create introductions; hiring stays between you and the member.
- **Transparent** — conflicts of interest are disclosed and managed; partnership income is reported to members.
- **Output-driven** — every partnership is scoped around a concrete output: introductions, a briefing, a pilot, a program intake.

Mining & O&G operators
Attract and retain bilingual talent
Reach Korean-heritage engineers, operators and trades already working in Australia — and graduates entering the industry.

METS & technology
Test ideas with people who run the site
Practice communities give technology providers direct access to operational feedback and to Korean technology partners.

Universities & research
Industry-connected collaboration
Co-design applied research and student pathways with members who bridge Australian sites and Korean institutions.

Korean Mining Professionals Australia Inc.
kmpa.com.au · **info@kmpa.com.au**
Australia–Korea Resources, Technology & Leadership Network

2026 is KMPA's foundation year; partnership packages and pricing are confirmed for 2027. Incorporated association registered in Western Australia.
